

Demo Selenium 2

@somkiat

Software

- Eclipse IDE + Maven plugin
- Firefox / Chrome
- Firebug

Step 1 :: Create WebDriver + URL

```
WebDriver driver = new FirefoxDriver();  
driver.get(https://secure.truemoney-dev.com/tmxonline11-  
devpoc/home);
```

Step 2 :: Locate element in page

```
WebElement username = driver.findElement(By.id("username"));  
WebElement password = driver.findElement(By.id("password"));  
WebElement captcha= driver.findElement(By.id("captcha_code"));
```

Step 2 :: Locate element in page

```
WebElement username = driver.findElement(By.name("username"));
```

```
WebElement password = driver.findElement(By.name("password"));
```

```
WebElement captcha= driver.findElement(By.name("captcha_code"));
```

Step 2 :: Locate element in page

```
WebElement username =  
driver.findElement(By.xpath("//input[@id='username']"));  
WebElement password=  
driver.findElement(By.xpath("//input[@id=password]"));  
WebElement captcha=  
driver.findElement(By.xpath("//input[@id=captcha]"));
```

Step 3 :: Verify

```
assertTrue(driver.findElement(By.id("username")).isDisplayed());  
assertTrue(driver.findElement(By.id("password")).isDisplayed());  
assertTrue(driver.findElement(By.id("captcha_code")).isDisplayed());
```

```
WebElement username = driver.findElement(By.id("username"));  
WebElement password = driver.findElement(By.id("password"));  
WebElement captcha= driver.findElement(By.id("captcha_code"));
```

Step 4 :: Fill in data

```
username.sendKeys("your username");  
password.sendKeys("your password");  
captcha.sendKeys("your captcha");
```

Step 5 :: Click or submit form

```
WebElement submitButton = driver.findElement  
(By.id("wpsubmit"));
```

```
submitButton.click();
```

Step 6 :: Close and Destroy driver

```
driver.quit();  
driver.close();
```

Let's Demo !!!

- TMX login
- TMX register
- TMX Buy TMN cash card
- TMX Topup
- Download File
- Upload file
- Drag and Drop
